

A New Generation of Tools. For a New Generation of Pros.

Spectra Precision is the brand that has introduced every major laser innovation since inventing the industry. Now, these portable laser tools give you a whole new generation of productivity.

Crossline layout lasers give you enough plumb, level and square references to finish a room in a fraction of the time it takes with traditional tools. One self-leveling setup and you can install walls, windows, doors, cabinets, chair rails, counters and anything else that needs to be right.

The three and five point lasers are ideal for layout of interior walls, drywall track installation, installation of overhead or floor fixtures, transferring points, checking plumb and square, and short-range leveling.

And, the HV01 is like a GC crew in a case. It can handle just about anything interior, and most exterior leveling applications. Plus, all of these tools are rugged enough for the toughest jobsite and designed to survive a 3-foot (1 m) drop onto concrete. And they are all backed by the industry's only 3-year instant over the counter exchange warranty.

Get your hands on a whole new generation of productivity today!

The Broadest Line From the Strongest Name in Lasers

**Toughest on Earth.
Best Warranty.
Easiest to Use.**

5.2XL Multi-Purpose 5 Point & Crossline Laser

- Two tools in one – horizontal and vertical crosslines, plus a 5 beam laser pointer
- Self-leveling for accuracy – beam flashes if it gets knocked or bumped out of level
- Bright laser points are sharp, focused and easy to mark thanks to patented laser technology
- Versatile and durable – increase your productivity on every job with 3 year worry-free warranty protection
- Productive for most interior jobs, and exterior elevation and alignment applications with optional HR220 receiver
- Easy to operate – simple 2-button keypad lets you select any or all crosslines and beams

LP30 & LP50 3-Beam and 5-Beam Laser Pointers

Three and five point lasers are ideal for interior wall layout, level and plumb alignment of doors, windows, cabinets and chair rails. Perfect for point transfer.

- Versatile – replaces a square, plumb bob, level, optical instrument in the toolbox
- Fast and accurate set-up – self-leveling, and advanced dampening technology
- Brightest beam – patented technology, highly visual in all conditions for better productivity
- Compact – easily fits in your tool belt so it's always at hand
- Multipurpose – one tool does level, plumb and 90-degree beams... use on every job every day
- Tough and durable – able to withstand a 3-foot (1 m) drop... IP54 rated

HV101 Interior/Exterior GC Leveling Crew in a Case

Everything you need for better productivity in acoustical ceiling installation, drywall installation, squaring/layout, interior finishing work and residential or light commercial construction

- Versatile – can be used indoors or outdoors for total productivity
- Automatic self-leveling in both horizontal and vertical planes increases productivity
- Brightest beam – easily visible even in brightly lit conditions
- Tough & durable – water, mud, and shock resistant, able to withstand a 3-foot (1 m) drop onto concrete... IP54 rated
- Split beam – enables plumb point transfer and 90-degree layout
- Remote control - scanning, speed control, slope setting, and alignment control for fast one person setups
- Accurate – ± 3 mm @ 30 m ($\pm 1/8$ in @ 100 ft), red LED flashes if it becomes out of level for any reason

LT20 Crossline Laser Tool

- Self-leveling for quick and accurate setups
- Bright beams for good visibility even in bright conditions
- Rugged design – extensive overmold allows a 3 ft (1 m) drop specification
- Wide laser beam fan angle allows maximum coverage
- Horizontal only, vertical only or both together
- Versatile mounting accessory – can be mounted on most tripods, columns and poles and adjusted horizontally and vertically

LT56 Universal Laser Layout Tool

- Bright crisp laser lines - extends the working range and are easy to see
- Lithium-Ion batteries provide 25 hour operating time - huge savings on battery cost compared to alkaline models and are ecological friendly
- Rugged and durable - 3 foot (1m) drop specification means the LT56 can keep working even after minor accidents
- Versatile mounting accessory - includes ceiling track, magnetic and tripod mounts with rotation and fine vertical adjustment
- The HR220 Line Receiver can be added for short range exterior layout and elevation control
