Bug Fixed

- Fixed 2 bugs related to Post- processing with MM50.
 - One of them specific to data recorded after WNRO
 - The other one linked to maximum nb of attributes per layer witch has been increased from 50 to 100.

Special notes

- By default, GLONASS processing of UBlox data is **enabled**. If needed, end-users can enable/disable GLONASS processing through MobileMapper Office 5.0 user interface:
 - In the Raw Data timeline, select the U-Blox rover file
 - In the Properties window, set the “Enable GLONASS” property to “No”
- Coordinate System definitions are different on Android platforms (MobileMapper 50), compared to Windows platforms (MobileMapper 20, 120 ...). Since the version 4.8, MobileMapper Office has been adapted to support the following coordinate systems in MobileMapper 50 maps:
 - DENMARK/ED50 systems
 - GREECE/HEPO_GGRS87 system
 - HUNGARY/HD72 system
 - LIECHTENSTEIN/LV03-7P system
 - NETHERLANDS/AMERSFOORT with RD NAP projections
 - ROMANIA/ETRS89 with Oblique_Stereographic_SP1930 and SP1970 projections
 - SOUTH AFRICA systems
 - SWITZERLAND/LV03-7P systems
 - USA/NAD83-2011-CORS96-2007/Alaska Zone 1 system
 - USA/NAD83-86 systems
 - USA/NAD27 systems
