Survey Office (SO) Subscription + Perpetual Offering Comparison

The v5.90 release introduces three subscription offering options for Survey Office consisting of different combinations of perpetual editions and modules. This bulletin details the comparable features between the Survey Office subscription and perpetual license options.

Starter

For surveyors who complete field data adjustments and quality control checks with basic survey CAD and model prep tools. Highlight features include survey adjustments, CAD, surface, and alignment support.

Starter subscription compares to the Survey Intermediate perpetual edition excluding image management and basic point cloud commands.

Site + Field

For surveyors who need a field-to-finish survey CAD software for traditional GNSS, Total Station and Digital Level based deliverables. Highlight features include survey adjustments, CAD, surface, alignment, corridor, and data prep support.

Site + Field subscription compares to the Survey Advanced perpetual edition with adding data prep tools.

Survey + Mapping

For surveyors who embrace the latest technology and strive for a competitive edge. Create compelling deliverables from all traditional sensors as well as 3D point clouds and GIS data. Highlight features include survey adjustments, CAD, surface, alignment, corridor, data prep, point clouds, scanning, and GIS connection support.
