

## Protection Plan Comparison Chart

# Features & Benefits

## Trimble Protected Plus plan v. Factory Warranty

### Features

#### Trimble Protected Plus:

A Trimble Protected protection plan covers everything your original Trimble® product warranty covers, plus several value-added enhancements, as shown in the table below.

Protection plans are available on Trimble Geospatial: Controllers, Tablets, GNSS Receivers, Total Stations, GNSS Firmware, Office Software.

### Benefits

- Trimble Protected Plus is the only plan designed specifically for buyers of Geospatial hardware, software & firmware; they enhance and sustain your entire ownership experience with worry-free coverage.
- Our Trimble Protected Plus coverage entitles you to a new or like-new piece of equipment with comparable features if yours can't be fixed, or if it simply makes more sense to replace it.
- Backed by Trimble Inc. which has earned the reputation of taking care of their customers.
- A protection plan prevents incompatibility issues between the software and the hardware in the field. A software protection plan will in most cases save you time and money
- ▶ An annual protection plan:
  - Costs less than the average repair cost
  - Locks in tomorrow's repair costs at today's prices
  - Keeps you running, minimizing unnecessary downtime and improves your overall efficiency
