Weighs ~ 1.5 kgs. (3.3 lbs.)

BoltX

Vidisco is proud to announce the launch of its newest X-ray panel, the ruggedized **BoltX**. Never before have such outstanding X-ray capabilities been available in such a super compact, smart lightweight unit.

With a physical size of 195 x 125 x 35 mm (7.67 X 4.92 X 1.37") (without the handle) and a weight of about 1.5 kilograms (3.3 lbs.), this super mobile DDA (Digital Detector Array) panel is smaller and lighter than any portable X-ray system produced by Vidisco today.

Despite its small dimensions, the new BoltX panel offers outstanding imaging capabilities:

- Rugged design
- Extraordinary Resolution of up to 6.6 lp/mm
- Viewing area of 145 X 115 mm (5.7 X 4.5")
- Imaging from the edge on three sides
- Plug & Play with **X** Series systems & **X**bit software, and compatible with **X** Series accessories
